All classes except O (open) are split between street and race (R) tires. i.e., (C / CR, D / DR, G/ GR, etc.)

Non-OE tires with a treadwear rating of 200 and below are considered R-compound (race) tires.

All modifications which are essentially for comfort or cosmetics (pedals, steering wheels, shift knobs, etc.) are allowable with no extra points added.

Note: Classifications can change during the year as the autocross committee reviews new information.
